Additional information

It is important that you attend your planned appointment to receive your Apretude[∇] injection to reduce the risk of getting HIV, and possibly developing resistance.

You can still get HIV when taking Apretude, so other measures should also be taken to further reduce your risk. Discuss these additional precautions with your doctor. Further information can be found in the Guide for Users of Apretude.

ViiV Healthcare. Adverse events should be reported.

[∇]This medicine is subject to additional monitoring. This will allow quick identification of new safety information. You can help by reporting any side effects you may get. See [placeholder: please insert local safety reporting information here] for how to report side effects.
